

To Members and Friends of the Endometriosis Association:

We are very pleased to announce the launching of the webcast of the Endometriosis Association 25th Anniversary Conference. The webcast offers video coverage of the latest research, surgical, clinical, and patient information from the most comprehensive conference in Association history. The webcast costs only \$70 (members) or \$105 (nonmembers). You get 60 days of access from the date of your purchase. Available 24 hours a day!

For information and to access the webcast visit <http://www.EndometriosisAssn.org>.

Endometriosis: The Big Picture, The True Picture, Emerges

EA-05-301

Debate

Endo Is a Body-Wide Immune System Disease Requiring Comprehensive Treatment, *Deborah Metzger, MD, PhD*

Endo Is a Locally-Focused Disease Only Requiring Good Surgery *David Redwine, MD*

Two prominent experts in the field of endo with two every different points of view. Dr. Redwine has been a leading proponent of complete surgical excision as a method to “cure” endo, and Dr. Metzger of an immune-based treatment approach, covering multiple facets of endo.

Cancer and Endometriosis: What Are the Facts?

Louise Brinton, PhD

The leading authority on endo and cancer from the U.S. National Cancer Institute will cover the research on the six cancers now linked to endo.

EA-05-302

Preventing Endometriosis and Its Related Problems

Ted Schettler, MD, MPH, Joseph McWherter, MD, Marla Ahlgrimm, RPh

Eminent experts explain prevention approach. All who have suffered from endo and its many related problems want to do everything to prevent the health problems from affecting our children and families and to prevent further problems for ourselves.

A Unifying Theory on Endometriosis: Inflammation, Autoimmunity, and Cancer

Roberta Ness, MD, MPH

A top expert on autoimmunity and its relationship to other diseases presents a way to look at endo and its related diseases from a unified point of view. This phenomenal lecture will help you understand the major metabolic dysfunctions underlying endo.

EA-05-303

Surgery and Endometriosis: We're Still Learning

John Jarrell, MD, Tony Luciano, MD, Dan Martin, MD, Camran Nezhat, MD

Leading clinicians and pioneers in the field of endometriosis discuss key topics: Regulation of surgery; laparoscopically-assisted vaginal hysterectomy and supracervical hysterectomy; endometriosis after hysterectomy, and safe, effective surgery – including detection and intervention for ovarian cancer.

EA-05-304

Medical Treatments for Endometriosis: Lots of New Options – and Modified Older Options – on the Horizon

David Olive, MD, David Adamson, MD, William Schlaff, MD, Barbara Soltes, MD

Topics include estrogen receptor-beta agonists; angiogenesis inhibitors/statins; selective progesterone receptor modulators, and progestins (a new formulation of Depo-provera, Mirena coil, and others); new formulations of GnRH agonists and antagonists; and oral contraceptives.

EA-05-305

Autoimmune Diseases and Endometriosis

*Pamela Stratton, MD, Andrew Cook, MD, Deborah Metzger, MD, PhD
Darin Ingels, ND, Luis Paez, MD*

Expert researchers and practitioners discuss high rates of autoimmune disorders among women with endo (and important findings from the Endometriosis Association research registry), provide information about these disorders and ideas for managing them. Includes: chronic fatigue immune dysfunction syndrome (CFIDS), candidiasis, fibromyalgia, Lyme disease, pelvic endo, interstitial cystitis, irritable bowel syndrome, and others.

EA-05-306A

Coping With Endometriosis As a Family

Lori and Steve Schott, Ally Schott, Gene and Judy Oestreicher

Led by families who have been there and become stronger for the experience. Endo affects the whole family! It can pull you together or tear you apart.

EA-05-306B

The Traditional Chinese Medicine Treatment Approach to Endometriosis

Daoshing Ni, Lac, PhD, DOM, Dipl CH, Michele Ingels, MTCM, Lac

Explanation of endo and its treatment from the Traditional Chinese Medicine point-of-view.

EA-05-307A

New Approaches to the Pain of Endo, Especially Pain With Sex

Karen Berkley, PhD, Chuck Miller, MD, Leann Croft, MS, PT

A scientist, medical doctor, and physical therapist discuss how endo causes pain; a new technique for relieving pain with sex; physical therapy and endo.

EA-05-307B

The Nutrition Approach to Endometriosis

Kevin G. Osteen, PhD, Sally Rockwell, CCN, PhD, Dian Mills, Cert. Ed., BA Dip. Ion MA

A valuable discussion: Research findings on nutrition and endo; Change your food, change your life – custom diets for those with endo; How women with endo have healed with a nutritional approach to treatment endo and related health problems.

EA-05-308A

Detoxification and Chelation – A Way for Women With Endo to Remove Fast-Soluble Toxins and Heavy Metals

Gerald Ross, MD, Kalpana Patel, MD

Two top environmental medicine specialists explain how to safely remove toxic chemicals such as dioxin and heavy metals from the body.

EA-05-308B

Infertility as Seen Through the Endometriosis Lens

Linda Giudice, MD, PhD, David Adamson, MD, Judith Sullivan, Elizabeth Dougherty

Workshop includes leading topics: Infertility and environmental contaminants; Do infertility treatments make endo worse; How I got pregnant.

EA-05-309A

What's New in the Endometriosis Association Research Program

Kevin G. Osteen, PhD, Sherry Rier, PhD, Grant Yeaman, PhD, Kaylor Bruner-Tran, PhD

The research team reports on recent research projects and findings as well as a serum diagnostic test in development.

EA-05-309B

Living Well in Spite of Endometriosis

Rona Silverton, PhD, Gay Marie Catania, Betsy Dynako, Angela Segal-Glazer, PhD

Excellent panel on ways to take charge of our health. Topics include: An active approach to endo makes for better results; Maintaining and regaining one's sense of self-worth; the glass is half full; tips on maneuvering endo stress with a positive attitude; and "I love my endo and so can you."

Many thanks to Ray Harris and the team at Webcast Group Inc., Bill Finn and team at Finn Digital, and the folks at Veranda.
